The Department of Labor (DOL) has released the expenditure authority for the outstanding \$7 million of the Flood Assistance 1998 project. This brings the total expenditure authority for the project to \$25 million. The DOL also extended the termination date of the project an additional month. The term of the project is now February 19, 1998, through March 31, 1999. Future subgrant modifications will reflect this. The DOL advised that the request for the additional \$57.7 will be addressed under separate cover. We do not anticipate further response on this matter until late June or early July. Although the full request may not be fully satisfied, additional funding is anticipated.

Attached is a listing of the current allocation levels by project operator. These allocations are need based, but limited by total funding availability. Some allocations are new, some allocations are net increases and some allocations restore prior funding levels. Where needed, subgrant modifications will be processed to adjust funding levels to those levels reflected on the list. It is our intent, to the extent possible, to sustain project operation until DOL provides notification of final funding. This may require the funding redirection among project operators.

It is expected that newly funded projects will begin operations immediately. The May 31, 1998, Monthly Supplemental Estimate Report should reflect participant activity, accrued expenditures and provide project implementation status information. This May report is due June 3, 1998. The DOL will review these reports in relation to making further funding decisions.
